Plant Description

**Special Features**
Formula mixture including 16 different Sedum species for a wide spectrum of its use for various positions and climates. Sedum acre, album, ellacombianum, floriferum, hispanicum, hybridum, montanum, oreganum, pulchellum, reflexum, selskianum, sexangulare, spurium, stoloniferum. Direct sowing approx. 1g/m².

**Basic Colour**
(mixture)

**Natural Flowering Period**
May - September

**Winter Hardiness Zones**
Z5 - Z8

**Height with Flowers**
40 cm

**Usage**
for the rock garden / for green roofs

Cultivation

**Grams per 1000 seeds**
0.05556 Gram

**Seeds per Gram**
18000 (does not correspond to the number of plants!)

**Gram to get 1000 plants**
0.25 Gram (if sown directly into pots etc. you will need a larger quantity)

**Sowing Direction**
(4) These are very tiny seeds which should be mixed with finest sand or talcum for an even sowing. Do not cover with compost, only press them in gently. Irrigate from the bottom or with a hand-sprayer, so that the seeds will not be washed away.

(15) Rapidly germinating, keep seed in constant moisture (not wet) with temperatures of about +20°C [68°F]. Seeds must be covered thinly. Do not cover very small seeds, but tightly press into the earth. Keep in cooler conditions after germination occurs.

(16) See 15 with the exception of germination being slower and more irregular. This poses no problems.
