### Plant Description

<b>Article Type</b>	JET® heat-treated seed
<b>Life Cycle</b>	Perennial
<b>Family</b>	Papilionaceae
<b>Special Features</b>	10-12 blossom-stalks per plant. Heat-treated seed is virtually Colletotrichum free, a secondary infection is still possible, please prevent!
<b>Basic Colour</b>	(mixture)
<b>Flower Colour</b>	mixture
<b>Natural Flowering Period</b>	June - August
<b>Flowering</b>	First year flowering
<b>Winter Hardiness Zones</b>	Z3 - Z8
<b>Height with Flowers</b>	50 cm
<b>Usage</b>	for the rock garden / patio plant

### Cultivation

<b>Grams per 1000 seeds</b>	20 Gram
<b>Seeds per Gram</b>	50 (does not correspond to the number of plants!)
<b>Gram to get 1000 plants</b>	50 Gram (if sown directly into pots etc. you will need a larger quantity)

**Sowing Direction**

(7) These seeds must be covered with a layer seed kernel diameter. Keep daytime temperatures at approximately +20°C [68°F], and keep the moisture constant, for Cyclamen, however, +18°C [64°F] is recommended. The seeds must be kept in the light and moderately warm after germination.

(10) For these bigger hard-shelled seeds, mechanical damaging of the shell is helpful for quicker swelling. One method is to grind the seed in dry sharp sand. They can also be treated for several hours in a “softener” (Polyethylenglycol 6000), which is used for the production of plastic material.
