Plant Description

Life Cycle	Perennial
Family	Apiaceae
Special Features	Brilliant white umbels, purple colored stems, perennial.
Basic Colour	(white / cream)
Flower Colour	brilliant white
Natural Flowering Period	June - August
Winter Hardiness Zones	Z3 - Z8
Foliage	glossy, dark green, golden fall colour
Height with Flowers	50 cm
Soil Requirements	average
Location	 
Characteristics	ornamental foliage plant / medicinal plant / tea herb / culinary herb
Usage	honey-bee food plant / for the rock garden / suitable for cutting

Cultivation

Grams per 1000 seeds	5.40541 Gram
Seeds per Gram	185 (does not correspond to the number of plants!)
Gram to get 1000 plants	15 Gram (if sown directly into pots etc. you will need a larger quantity)
Sowing Direction	(10) For these bigger hard-shelled seeds, mechanical damaging of the shell is helpful for quicker swelling. One method is to grind the seed in dry sharp sand. They can also be treated for several hours in a "softener" (Polyethylenglycol 6000), which is used for the production of plastic material.
