Plant Description

Life Cycle	Perennial
Family	Ericaceae
Origin	Central-, North Europe, Central-, North Asia, North America: coniferous forest, moor, heath.
Basic Colour	(white / cream)
Flower Colour	white to pink
Natural Flowering Period	May - June
Winter Hardiness Zones	Z2 - Z7
Foliage	obovate, upper side dark green, other side dotted light green
Growth Habit	stoloniferous / shrubby / evergreen
Height with Flowers	15 cm
Soil Requirements	avoid lime / moist
Location	
Characteristics	decorative fruit / medicinal plant / beneficial plant / culinary herb / groundcover
Usage	honey-bee food plant

Cultivation

Grams per 1000 seeds	0.24096 Gram
Seeds per Gram	4150 (does not correspond to the number of plants!)
Gram to get 1000 plants	1 Gram (if sown directly into pots etc. you will need a larger quantity)

Sowing Direction

(8) These perennial seeds germinate very irregularly over a long period. Lower temperatures of less than +5°C [41°F] are very effective. Seed trays should not be discarded prematurely. Constant moisture must be maintained. Do not leave in direct sunlight. For Alstroemeria we recommend to keep sowing for 3 weeks at approximately +30°C [86°F], then 3 weeks at +5°C [41°F], then at +21°C [70°F].
