Plant Description

Article Type	JET® heat-treated seed
Life Cycle	Perennial
Family	Papilionaceae
Distinction	Fleuroselect Award Winner.
Special Features	10-12 blossom-stalks per plant. Heat-treated seed is virtually Colletotrichum free, a secondary infection is still possible, please prevent!
Basic Colour	(pink / salmon)
Flower Colour	pink-white
Natural Flowering Period	June - August
Flowering	First year flowering
Winter Hardiness Zones	Z3 - Z8
Growth Habit	compact
Height with Flowers	50 cm
Soil Requirements	well-drained / average
Location	
Usage	for the rock garden / flowering pot plant

Cultivation

Grams per 1000 seeds	25 Gram
Seeds per Gram	40 (does not correspond to the number of plants!)
Gram to get 1000 plants	50 Gram (if sown directly into pots etc. you will need a larger quantity)

Sowing Direction

(7) These seeds must be covered with a layer seed kernel diameter. Keep daytime temperatures at approximately +20°C [68°F], and keep the moisture constant, for Cyclamen, however, +18°C [64°F] is recommended. The seeds must be kept in the light and moderately warm after germination.

(10) For these bigger hard-shelled seeds, mechanical damaging of the shell is helpful for quicker swelling. One method is to grind the seed in dry sharp sand. They can also be treated for several hours in a “softener” (Polyethylenglycol 6000), which is used for the production of plastic material.
