Plant Description

| | |
|---------------------------------|--|
| Life Cycle | Perennial |
| Family | Papilionaceae |
| Special Features | White flowering panicles. |
| Historical | Native American traditional uses include--source of blue dye, eyewash, tea, poultice to relieve tooth pain, children used dried seeds pods as rattles. |
| Basic Colour | (white / cream) |
| Flower Colour | white |
| Natural Flowering Period | June - August |
| Winter Hardiness Zones | Z3 - Z9 |
| Foliage | light green |
| Height with Flowers | 120 cm |
| Soil Requirements | dry / well-drained / average |
| Location |  |
| Characteristics | decorative fruit / solitary plant |
| Usage | suitable for cutting |

Cultivation

| | |
|--------------------------------|---|
| Grams per 1000 seeds | 18.18182 Gram |
| Seeds per Gram | 55 (does not correspond to the number of plants!) |
| Gram to get 1000 plants | 40 Gram (if sown directly into pots etc. you will need a larger quantity) |

Sowing Direction

(8) These perennial seeds germinate very irregularly over a long period. Lower temperatures of less than +5°C [41°F] are very effective. Seed trays should not be discarded prematurely. Constant moisture must be maintained. Do not leave in direct sunlight. For Alstroemeria we recommend to keep sowing for 3 weeks at approximately +30°C [86°F], then 3 weeks at +5°C [41°F], then at +21°C [70°F].

Scheduling

Best Sowing Date

spring (northern Hemisphere, Field condition)
