Plant Description

Life Cycle	Perennial
Family	Papilionaceae
Origin	China
Special Features	Inflated red tinged seed husks, high content of astragalosid IV, high root yield, thick roots, TCM plant.
Basic Colour	(yellow / gold)
Flower Colour	light yellow
Natural Flowering Period	July - August
Winter Hardiness Zones	Z5 - Z9
Foliage	pinnatifid
Growth Habit	erect
Height with Flowers	130 cm
Soil Requirements	dry
Location	
Characteristics	decorative fruit / medicinal plant / tea herb / culinary herb

Cultivation

Grams per 1000 seeds	5 Gram
Seeds per Gram	200 (does not correspond to the number of plants!)
Gram to get 1000 plants	20 Gram (if sown directly into pots etc. you will need a larger quantity)

Sowing Direction

(8) These perennial seeds germinate very irregularly over a long period. Lower temperatures of less than +5°C [41°F] are very effective. Seed trays should not be discarded prematurely. Constant moisture must be maintained. Do not leave in direct sunlight. For Alstroemeria we recommend to keep sowing for 3 weeks at approximately +30°C [86°F], then 3 weeks at +5°C [41°F], then at +21°C [70°F].
