Plant Description

| | |
|---------------------------------|---|
| Life Cycle | Perennial |
| Family | Zingiberaceae |
| Origin | Eastern Himalaya |
| Special Features | TCM plant. |
| Basic Colour | (white / cream) |
| Flower Colour | yellowish-white |
| Natural Flowering Period | June - July |
| Winter Hardiness Zones | Z9 - Z10 |
| Foliage | dense clumbroad lanceolate |
| Height with Flowers | 150 cm |
| Soil Requirements | average |
| Location |  |
| Characteristics | medicinal plant / culinary herb |

Cultivation

| | |
|--------------------------------|---|
| Grams per 1000 seeds | 14.28571 Gram |
| Seeds per Gram | 70 (does not correspond to the number of plants!) |
| Gram to get 1000 plants | 50 Gram (if sown directly into pots etc. you will need a larger quantity) |

Sowing Direction

(14) A warm period of +25 to +30°C [77 to 86°F] and moist conditions after sowing for about 4–5 weeks neutralizes the germination inhibition. The phytohormones which inhibit germination will then break down. At this point the sowing needs very cool conditions, approximately +2°C [36°F]. Initial germination lasts for about 80 days under these conditions. During this period keep in dark cold storage chamber. Then temperature and lighting must be increased gradually.
