### Plant Description

<b>Article Type</b>	JET® heat-treated seed
<b>Life Cycle</b>	Perennial
<b>Family</b>	Ericaceae
<b>Origin</b>	Eastern North America
<b>Distinction</b>	Award of Garden Merit (A.G.M.) from the Royal Horticultural Society.
<b>Special Features</b>	Light pink bells, large brilliant red berries, reliable and heavy fruiting, healthy and vigorous.
<b>Historical</b>	Introduced by JELITTO PERENNIAL SEEDS in 2014.
<b>Basic Colour</b>	(pink / salmon)
<b>Flower Colour</b>	light pink
<b>Natural Flowering Period</b>	July - August
<b>Winter Hardiness Zones</b>	Z3 - Z8
<b>Growth Habit</b>	stoloniferous / bushy / evergreen
<b>Height with Flowers</b>	15 cm
<b>Spacing between Plants</b>	25 cm
<b>Soil Requirements</b>	avoid lime / well-drained / humus rich, fertile
<b>Location</b>	
<b>Characteristics</b>	decorative fruit / medicinal plant / groundcover
<b>Usage</b>	flowering pot plant

### Cultivation

<b>Grams per 1000 seeds</b>	0.26667 Gram
<b>Seeds per Gram</b>	3750 (does not correspond to the number of plants!)

<b>Gram to get 1000 plants</b>	1 Gram (if sown directly into pots etc. you will need a larger quantity)
<b>Plug tray recommended size(s)</b>	open flats
<b>Sowing Direction</b>	(8) These perennial seeds germinate very irregularly over a long period. Lower temperatures of less than +5°C [41°F] are very effective. Seed trays should not be discarded prematurely. Constant moisture must be maintained. Do not leave in direct sunlight. For Alstroemeria we recommend to keep sowing for 3 weeks at approximately +30°C [86°F], then 3 weeks at +5°C [41°F], then at +21°C [70°F].

## Scheduling

<b>Best Sowing Date</b>	late autumn - early spring (northern Hemisphere, Field condition)
<b>Sowing to Germination</b>	4 - 8 weeks
<b>Germination to Transplant</b>	4 - 8 weeks
<b>Transplanting to Potting</b>	6 - 10 weeks
<b>Cutting back at Transplanting</b>	Not Necessary.

## Growing On

<b>Container Size(s)</b>	1 plug per 8/9 cm (3 1/2") / 1-2 plugs per 11/12 cm (4 1/2")
<b>Vernalization</b>	There is no current research on vernalization but a prudent recommendation for any perennial would be 6-12 weeks (a few might need 15 weeks!) at an average daily temperature of 40°F (5°C). Exposure to cold may not be necessary for flowering but might improve quality.
<b>Forcing</b>	This species is not a suitable candidate for forcing.
<b>Fertilizer</b>	Medium (150-200 ppm)
