Plant Description

Life Cycle	Perennial
Family	Crassulaceae
Special Features	Strong-growing sedum with thick attractive rosettes of blue-green, flattened leaves - sometimes colored pinkish-purple. Enchanting corymbs of starry yellow blooms.
Historical	Introduced by JELITTO PERENNIAL SEED in 2007.
Basic Colour	(yellow / gold)
Flower Colour	bright yellow
Natural Flowering Period	June - August
Winter Hardiness Zones	Z4 - Z9
Foliage	blue-green, occasionally pinkish-purple
Growth Habit	stoloniferous / rosettes-forming / low-growing / evergreen
Height with Flowers	25 cm
Spacing between Plants	30 cm
Soil Requirements	dry / gritty / well-drained / average
Location	 
Characteristics	ornamental foliage plant / groundcover
Usage	for the rock garden

Cultivation

Grams per 1000 seeds	0.0303 Gram
Seeds per Gram	33000 (does not correspond to the number of plants!)
Gram to get 1000 plants	0.25 Gram (if sown directly into pots etc. you will need a larger quantity)
Sowing Rates/Trays	10 - 12 per cell

Plug tray recommended size(s)	128 / 288
Sowing Direction	(4) These are very tiny seeds which should be mixed with finest sand or talcum for an even sowing. Do not cover with compost, only press them in gently. Irrigate from the bottom or with a hand-sprayer, so that the seeds will not be washed away. (16) See 15 with the exception of germination being slower and more irregular. This poses no problems. (15) Rapidly germinating, keep seed in constant moisture (not wet) with temperatures of about +20°C [68°F]. Seeds must be covered thinly. Do not cover very small seeds, but tightly press into the earth. Keep in cooler conditions after germination occurs.

Scheduling

Best Sowing Date	Anytime (northern Hemisphere, Field condition)
Sowing to Germination	3 - 4 weeks
Germination to Transplant	4 - 6 weeks
Transplanting to Potting	6 - 8 weeks

Growing On

Container Size(s)	1 plug per 8/9 cm (3 1/2") / 1-2 plugs per 11/12 cm (4 1/2") / 2-3 plugs per 15 cm (6")
Fertilizer	Medium (150-200 ppm)
