Plant Description

Life Cycle	Perennial
Family	Crassulaceae
Special Features	Flower umbels.
Basic Colour	(red / scarlet / purple)
Flower Colour	carmine-red
Natural Flowering Period	July - October
Flowering	First year flowering
Winter Hardiness Zones	Z4 - Z9
Foliage	dark green, later bronze coloured
Height with Flowers	35 cm
Soil Requirements	average
Location	
Characteristics	ornamental foliage plant / groundcover
Usage	for the rock garden

Cultivation

Grams per 1000 seeds	0.04348 Gram
Seeds per Gram	23000 (does not correspond to the number of plants!)
Gram to get 1000 plants	0.25 Gram (if sown directly into pots etc. you will need a larger quantity)

Sowing Direction

(4) These are very tiny seeds which should be mixed with finest sand or talcum for an even sowing. Do not cover with compost, only press them in gently. Irrigate from the bottom or with a hand-sprayer, so that the seeds will not be washed away.

(16) See 15 with the exception of germination being slower and more irregular. This poses no problems.

(15) Rapidly germinating, keep seed in constant moisture (not wet) with temperatures of about +20°C [68°F]. Seeds must be covered thinly. Do not cover very small seeds, but tightly press into the earth. Keep in cooler conditions after germination occurs.
