Plant Description

Life Cycle	Perennial
Family	Zingiberaceae
Special Features	Small blooms.
Basic Colour	(pink / salmon)
Flower Colour	pink
Natural Flowering Period	July - August
Winter Hardiness Zones	Z5 - Z8
Growth Habit	rhizomatous
Height with Flowers	15 cm
Soil Requirements	well-drained / average
Location	
Usage	for the rock garden

Cultivation

Grams per 1000 seeds	4.54545 Gram
Seeds per Gram	220 (does not correspond to the number of plants!)
Gram to get 1000 plants	10 Gram (if sown directly into pots etc. you will need a larger quantity)
Sowing Direction	(9) These seeds germinate rapidly depending on species and origin. If germination does not occur after 3–4 weeks a cooling period of 2–4 weeks is recommended. (10) For these bigger hard-shelled seeds, mechanical damaging of the shell is helpful for quicker swelling. One method is to grind the seed in dry sharp sand. They can also be treated for several hours in a “softener” (Polyethylenglycol 6000), which is used for the production of plastic material.
