Plant Description

Life Cycle	Perennial
Family	Saxifragaceae
Origin	North America
Distinction	Award of Garden Merit (A.G.M.) from the Royal Horticultural Society. Selected as Perennial Plant of the year from the PPA (Perennial Plant Association).
Special Features	Consistent dark-leaved foliage. A truly reliable seed strain. Outstanding foliage plant, suitable also for floral arrangements. Perennial Plant of the Year 1991 in North America. Cool, evenly moist soils preferred though any well-drained soil will suffice.
Historical	The result of breeding work undertaken by JELITTO PERENNIAL SEED to improve the already popular 'Palace Purple', which had become plagued with very inconsistent seed strains. Introduced by JELITTO PERENNIAL SEEDS in 1996.
Basic Colour	(white / cream)
Flower Colour	Cream-colored
Natural Flowering Period	June - August
Flowering	First year flowering
Winter Hardiness Zones	Z3 - Z9
Foliage	nearly round, to ovate, with scalloped edges, metallic bronze-purple
Growth Habit	clumping
Height with Flowers	60 cm
Spacing between Plants	40 cm
Soil Requirements	average
Location	   
Characteristics	ornamental foliage plant / groundcover
Usage	for the rock garden / suitable for cutting

Cultivation

Grams per 1000 seeds	0.04762 Gram
Seeds per Gram	21000 (does not correspond to the number of plants!)
Gram to get 1000 plants	0.5 Gram (if sown directly into pots etc. you will need a larger quantity)
Sowing Rates/Trays	7 - 8 per cell
Plug tray recommended size(s)	128 / 288
Sowing Direction	(4) These are very tiny seeds which should be mixed with finest sand or talcum for an even sowing. Do not cover with compost, only press them in gently. Irrigate from the bottom or with a hand-sprayer, so that the seeds will not be washed away. (8) These perennial seeds germinate very irregularly over a long period. Lower temperatures of less than +5 °C [41 °F] are very effective. Seed trays should not be discarded prematurely. Constant moisture must be maintained. Do not leave in direct sunlight. For Alstroemeria we recommend to keep sowing for 3 weeks at approximately +30 °C [86 °F], then 3 weeks at +5 °C [41 °F], then at +21 °C [70 °F].

Scheduling

Best Sowing Date	late autumn - early spring (northern Hemisphere, Field condition)
Germination to Transplant	6 - 8 weeks
Transplanting to Potting	6 - 8 weeks

Growing On

Container Size(s)	1-2 plugs per 11/12 cm (4 1/2")
Fertilizer	Medium (150-200 ppm)
