### Plant Description

<b>Article Type</b>	JET® pure seed
<b>Life Cycle</b>	Biennial
<b>Family</b>	Malvaceae
<b>Origin</b>	Southwest Asia
<b>Special Features</b>	Saucer-shaped double blossoms. See also 'Chaters chestnut-brown', 'Chaters chamois', 'Chaters pink', 'Chaters red (scarlet)', 'Chaters salmon pink', 'Chaters violet', 'Chaters white', 'Chaters yellow', 'Chaters magnificent mixture'. A popular self-sowing, biennial that has been long associated with cottage gardens.
<b>Historical</b>	Origin of species is debatable but most likely found along the Silk Road from Turkey to Asia.
<b>Basic Colour</b>	(red / scarlet / purple)
<b>Flower Colour</b>	reddish-purple
<b>Natural Flowering Period</b>	May - October
<b>Winter Hardiness Zones</b>	Z3 - Z10
<b>Foliage</b>	petiolated, round to shallowly lobed, medium green
<b>Growth Habit</b>	erect
<b>Height with Flowers</b>	180 cm
<b>Spacing between Plants</b>	60 cm
<b>Soil Requirements</b>	well-drained / average
<b>Location</b>	
<b>Characteristics</b>	solitary plant
<b>Usage</b>	suitable for cutting

## Cultivation

<b>Grams per 1000 seeds</b>	3.84615 Gram
<b>Seeds per Gram</b>	260 (does not correspond to the number of plants!)
<b>Gram to get 1000 plants</b>	10 Gram (if sown directly into pots etc. you will need a larger quantity)
<b>Sowing Rates/Trays</b>	4 per cell
<b>Plug tray recommended size(s)</b>	72 / 128
<b>Sowing Direction</b>	(15) Rapidly germinating, keep seed in constant moisture (not wet) with temperatures of about +20°C [68°F]. Seeds must be covered thinly. Do not cover very small seeds, but tightly press into the earth. Keep in cooler conditions after germination occurs.

## Scheduling

<b>Best Sowing Date</b>	Anytime (northern Hemisphere, Field condition)
<b>Sowing to Germination</b>	2 - 3 weeks
<b>Germination to Transplant</b>	4 - 6 weeks
<b>Transplanting to Potting</b>	4 - 6 weeks
<b>Cutting back at Transplanting</b>	Cut-back once to keep more compact.

## Growing On

<b>Container Size(s)</b>	1-2 plugs per 11/12 cm (4 1/2") / 2-3 plugs per 15 cm (6")
<b>Vernalization</b>	There is no current research on vernalization but a prudent recommendation for any perennial would be 6-12 weeks (a few might need 15 weeks!) at an average daily temperature of 40°F (5°C). Exposure to cold may not be necessary for flowering but might improve quality.
<b>Forcing</b>	An obvious place to experiment - following vernalization - would be raising daytime temperatures to 60° - 65°F (15° - 17°C). Provide 16 hours of continuous lighting. During the short days of winter, provide a night interruption lighting of 4 hours between 10:00 p.m. and 2:00 a.m.
<b>Fertilizer</b>	Medium (150-200 ppm)
