Plant Description

Life Cycle	Perennial
Family	Araceae
Special Features	White spathe, spadix with red fruits. Plant of the Year 1988 in Germany.
Basic Colour	(white / cream)
Flower Colour	white
Natural Flowering Period	May - July
Winter Hardiness Zones	Z4 - Z9
Growth Habit	stoloniferous
Height with Flowers	25 cm
Soil Requirements	boggy
Location	 
Characteristics	decorative fruit / toxic plant
Usage	water or marshplant

Cultivation

Grams per 1000 seeds	2.94118 Gram
Seeds per Gram	340 (does not correspond to the number of plants!)
Gram to get 1000 plants	10 Gram (if sown directly into pots etc. you will need a larger quantity)

Sowing Direction

(18) See 17. Allow the seed trays to be left for only 2–4 weeks at warm temperatures, then keep at 0°C [32°F] for another 4–6 weeks. It does not matter if the water freezes. After this treatment allow temperature to rise gradually.

(17) Waterplants must be sown in waterproof plastic trays or similar containers containing a nutritious muddy compost. Fill water up to 1 cm over the top of the compost. Keep the trays at warm temperatures of approximately +22°C [72°F].
