### Cultivation

<b>Grams per 1000 seeds</b>	0.4 Gram
<b>Seeds per Gram</b>	2500 (does not correspond to the number of plants!)

STAUDENSAMEN · PERENNIAL SEEDS · GRAINES DE PLANTES VIVACES

Produktion – Züchtung – Samentechologie · Production – Breeding – Seed Technology

**Gram to get 1000 plants**

1 Gram (if sown directly into pots etc. you will need a larger quantity)

**Sowing Direction**

(16) See 15 with the exception of germination being slower and more irregular. This poses no problems.

(15) Rapidly germinating, keep seed in constant moisture (not wet) with temperatures of about +20°C [68°F]. Seeds must be covered thinly. Do not cover very small seeds, but tightly press into the earth. Keep in cooler conditions after germination occurs.
